NUMBER 1 JANUARY–FEBRUARY 1991

Editorial 1

The evaluation of technology in relation to products and markets: observations, considerations, experience, and solutions
P. A. Moerman 2

Fourth generation languages and integrated information systems for small manufacturing companies
A. P. Muhlemann, D. H. R. Price, J. A. Sharp, M. Afferson and K. Andrews 16

Architectures and auctions in manufacturing
D. M. Upton, M. M. Barash and A. M. Matheson 23

Probe and component set-up planning for coordinate measuring machines
M. J. Corrigall and R. Bell 34

A DGR method for extracting the topology of an upper-half profile of a turned part from CAD data
S.-L. Chen, Z. Chen and R.-K. Li 45

Book reviews 57

Announcements 60

NUMBER 2 MARCH–APRIL 1991

Special Issue: Processing Planning and Design for Manufacture

Guest editorial 61

An advice system for concurrent engineering
P. O'Grady, R. E. Young, A. Greef and L. Smith 63

The impact of an AI-based design environment for simultaneous engineering on process planning
S. Subramanyam and S. C.-Y. Lu 71

Design for die casting
S. Y. Liou and R. A. Miller 83

Computer-aided process design for the manufacture of rolled rings
S. Rachakonda, S. Gengusamy, J. S. Gunasekera and S. N. Dwivedi 97

ALPS: A language for Process Specification
B. A. Catron and S. R. Ray 105

An empirical methodology for measuring producibility early in product development
J. W. Priest and J. M. Sanchez 114

Flexible process planning for finish machining based on process requirements modelling
M. C. Wu and C. R. Liu 121

NUMBER 3 MAY–JUNE 1991

Editorial i

Conceptual modelling of manufacturing flexibility
M. Dooner 135

Reverse engineering: an evaluation of prospective non-contact technologies and applications in manufacturing systems
B. Bidanda, S. Motavalli and K. Harding 145

An approach to short interval scheduling for discrete parts manufacturing
G. Chryssolouris, K. Dicke and M. Lee 157

Innovation and development strategy
H. J. W. Vliegen and H. H. Van Mal 169

The role of automated guided vehicles within cellular manufacturing as a shop floor contribution to CIM
R. J. V. Lee and R. Leonard 176

Storage and industrial truck selection expert system (SITSES)
J. Trevino, B. J. Hurley, V. Clincy and S.-C. Jang 187

Announcements 195

NUMBER 4 JULY–AUGUST 1991

Editorial i

Supply chain dynamics
D. R. Towill 197

A knowledge-based CAD system for concurrent product design in injection moulding
Y.-J. Huh and S.-G. Kim 209

Automated rapid prototyping with heuristics and intelligence: Part I—configuration
M. Anjanappa, J. A. Kirk, D. K. Anand and D. S. Nau 219

Automated rapid prototyping with heuristics and intelligence: Part II—implementation
J. A. Kirk, D. K. Anand and M. Anjanappa 232

Machinable volumes extraction—non-black type raw material input
R.-K. Li and S.-D. Tzieng 241

Resolution of multiple conflicts in the Petri-net model of FAS
S. K. Son, B. K. Choi, T. U. Park and H. Lee-Kwang 253

Book review 263

NUMBER 5 SEPTEMBER–OCTOBER 1991

An independent description of standard and repetitive parts for CAD systems
H. Loop and E. Häusele 265

Approach to CIM in NIPPONDENSO Kota plant
M. Sakakibara and K. Matsumoto 279

An approach to CIM system development whereby manufacturing people can design and build their own CIM systems
R. E. Young and J. Vesterager 288

Computer-aided part program segmentation and reconstruction for minimization of machine tool residence time
W. A. Khan and D. R. Hayhurst 300

On-line control of a manufacturing cell using visual inspection
A. Razban and B. L. Davies 315

Book reviews 321

NUMBER 6 NOVEMBER–DECEMBER 1991

Management of information in a system of heterogeneous distributed data bases using the example of a PCB assemblage
A. R. Hidde 323

Real-time scheduling in computer integrated manufacturing: a review of recent research
C. M. Harmonosky and S. F. Robohn 331

Feature taxonomies for rotational parts: a review and proposed taxonomies
J.-Y. Kim, P. O'Grady and R. E. Young 341

INformation Systems for Integrated Manufacturing (INSIM): a design methodology
G. Harhalakis, C. P. Lin, L. Mark and P. R. Muro-Medrano 351

An intelligent user interface in a knowledge-based modelling system for the design of flexible manufacturing facilities
W. Wang and R. Bell 364

Index 375
